

workshop

Are you a code citizen of any experience/skill level, from hobbyist to professional?

We'd like your input to understand what you think about when you consider security in code development.

We are looking for code developers from all levels of experience, to take part in an interactive information gathering workshop; a Future Forum for the Secrious Project.

What's the forum for:

The Secrious Project ultimately aims to create Serious Games that teach players about the importance and benefits of including security measures in their programming code from the outset. The Forum will include whole group discussions, anonymous comment boards, smaller group activities, and a group design activity.

By taking part in the Future Forums you will be entering a draw to win £50 of gift vouchers from Amazon.

Future Forum Date

15/12
