

LOCO 2024

1st International Workshop on Low Carbon Computing

3rd December 2024, University of Glasgow

About

An initiative of the Scottish Programming Languages Institute (SPLI) supported by the Scottish Informatics and Computer Science Alliance (SICSA), the **1st International Workshop on Low Carbon Computing (LOCO 2024)** will bring together researchers and practitioners with a keen interest in low carbon and sustainable computing.

The workshop will be a hybrid event hosted at University of Glasgow's state-of-the-art [Advanced Research Centre](#) and will provide an inclusive, accessible forum for sharing new ideas, for presenting ongoing work and early results, as well as for bringing forward well-founded criticism.

Opportunity for Sponsors

We are delighted to offer the chance for you to be involved in this exciting event by becoming a SICSA Sponsor.

Sponsorship of LOCO 2024 will provide you with exposure to 50 delegates in-person (plus online participants) comprising Computing Science academics, research students and practitioners, as well as the opportunity for up to 2 company representatives to attend the Workshop. This is an opportunity to contribute to a unique event—the first of its kind—which is delivered purely for the advancement of sustainable computing. Full information on sponsorship can be found below.
